

**Mother of Autistic Boy Praises
GestureTek Portable Interactive Multi-Sensory Floor**

“These are amazing tools that your company has created...so many new and wonderful opportunities especially for those with special needs and autistic children.

“We saw your Cube at the Old Navy store. My high-functioning autistic son interacted with his brother without a fight. I could have stayed there all day just watching them play.

“I hope that your company takes the world by storm and that everyone sees what I see. I believed in your company so much that I would change careers to work with these products. They are just amazing. I see so much potential with your company.”
