

The **Gesturetek® Immersive Therapy Cart** is a complete mobile therapy solution that provides over 20 different immersive applications and delivers them right to the patient, anywhere in a care facility. The cart can be used in the procedure recovery room, patient room, therapy room or in common areas, with the patient in a bed, a chair or standing position. The opportunity for the patient to engage in music therapy, become active in virtual play, or immerse themselves in a soothing sensory environment brings a whole new element of enjoyment and participation to any therapy program.

The Cart

Delivered on a rechargeable medical cart, the therapy system is durable and easy to move from patient to patient. The use of **Gesturetek's** gesture control system ensures that all patient movements are low impact and that patient cross-contamination is virtually eliminated.

The Experience

Using **Gesturetek's** patented gesture control technology, the patient does not have to wear, hold and be attached to a computer to experience the latest immersive therapies. Whether relaxing in a virtual sensory environment, engaging in immersive play, or exploring the depth of the interactive music therapy world, the patient receives low impact activation, motivation and stimulation.

Immersive technology has been the subject of extensive research and **Gesturetek** has been at the forefront of this research working with a number of Universities around the world on the development of gesture based applications. Medical research confirms that virtual therapy is beneficial for persons with cognitive and physical disabilities including those with cerebral palsy, autism, Alzheimer's, and dementia as well as those recovering from stroke, traumatic brain injury and other conditions.

GestureTek Inc. is the inventor and world leader in camera-enabled, gesture-based computer control. **GestureTek's** numerous patents for single and multiple camera solutions are the basis for a wide variety of interactive display solutions. Users interact with on-screen computer content using hand and body gestures, without the need for peripheral devices.

All trademarks and registered trademarks are the property of their respective owners.

GestureTek technology is protected under numerous comprehensive patents in the United States and other countries. U.S. patents include 5,534,917 (Video image based control system) and 7,058,204 (Multiple camera control system).

The **Immersive Therapy Cart** incorporates **Gesturetek's** patented gesture control technology which means that patients can interact with any virtual world or environment by simply moving their body.

Benefits to Patient

1. Full suite of over 20 applications maintains patient interest.
2. Research has shown that Immersive Therapy can provide an important role in pain diversion for many patients.
3. Gesturetek applications have been proven to provide important patient distraction, motivation and engagement.
4. No touch software means unencumbered operation and patient cross contamination is all but eliminated.
5. Separate dedicated programs for sensory stimulation, and Music Therapy.
6. Gesturetek's flexible software can be customized to provide cause/effect outcomes even for patients with limited mobility and range of motion.

Product Group	Playmersion	My Music World	Sensory World	My Music Composer

Titles/Features	Soccer Ninja Wizards Cavern Orbosity Coconut Shooter Shark Volleyball Juggler Space Ball	Drums Horns Tamborine Dance Farm Animals	Serenity (Mist) Tranquility (Clouds) Immersion (Underwater) Solitude (Space) Floating (Ripples) Diversion (Leaves) Activation (Balloon) Play (Ball Game) Muskoka (Cottage)	5 Pre-loaded Scales Violin Trumpet Piano Organ Guitar

About GestureTek

GestureTek is the world leader in computer vision for gesture based control of information and entertainment systems and displays. GestureTek's gesture recognition technology is employed in a wide array of applications and environments, where the user is either stepping on or into interactive floor/wall projections, pointing at a display from any distance, or has their real-time actual video image immersed on the screen. Public installations and kiosks appear in multiple markets: museum and science centres, military control rooms, clean rooms, and location-based-entertainment facilities, retail locations, physical rehabilitation programs interactive floors/windows and interactive billboards. Consumer applications include home PC, console gaming, toys, as well as mobile devices. GestureTek headquarters are in Toronto, Canada, with additional offices in Ottawa, Silicon Valley, and New York. For information and/or a DVD or video, contact.

About GestureTek Health

GestureTek Health is a division of Gesturtek Inc. delivering the benefits of virtual therapy and gesture control to patients and care givers.
